

Divyang Mistry

AI Developer | Lead Software & DevOps Engineer

✉ divyangmistry7777@gmail.com ☎ [+91 7777901836](tel:+917777901836) 📍 Adalaj, Gandhinagar, Gujarat, India

Summary

AI Developer, Lead Software and DevOps Engineer with over 7 years of experience driving the full product lifecycle of complex cybersecurity, SaaS, and AI-powered solutions. Specialized in building autonomous AI agents using **Google GenAI SDK** and **Model Context Protocol (MCP)** to automate enterprise workflows. Expert in LLM orchestration, RAG pipelines (LangChain), Proxmox virtualization, Docker and security hardening. I bridge technical engineering and business strategy, leading cross-functional teams to deliver high-performance, AI-driven products while maintaining rigorous cybersecurity standards.

Projects

Advance Cyber Kiosk

Led development and delivery as Product Lead for hardware-integrated forensic kiosk, managing full-stack development, UI/UX design, and deployment to government and enterprise clients.

Private Network Infrastructure

Architected secure internal networking using Headscale, Keycloak authentication, and OpenSource VPN solutions.

Enterprise Virtualization

Deployed Proxmox-based virtualization infrastructure with QEMU/KVM for scalable development and production environments. Designed and implemented end-to-end CI/CD pipelines with Jenkins, Docker, and Kubernetes for automated deployment workflows.

Docker AI Agent (MCP-based)

2025

Built an autonomous AI agent using **Google GenAI SDK** and **Model Context Protocol (MCP)** to orchestrate Docker operations. The agent reasons over tasks, selects tools dynamically and executes multi-step workflows, enabling natural language control of containers, images, and compose stacks without manual CLI intervention.

AI Workflow Automation (n8n)

Designed and deployed intelligent automation workflows using **n8n** with integrated LLM nodes, enabling automated business processes, document processing pipelines, and AI-assisted decision routing across enterprise systems.

Experience

Arishti Info Labs

Adalaj, Gujarat, India

Lead Product Engineer

Jun 2023 - Feb 2026

- **Product Strategy & Execution:** Direct end-to-end product strategy for cybersecurity portfolio including 'Advance Cyber Kiosk', ensuring alignment with market demands and business goals.
- **DevOps Architecture:** Design and implement enterprise DevOps infrastructure using Proxmox virtualization, QEMU/KVM, and automated CI/CD pipelines with custom orchestration. Deploy comprehensive infrastructure for monitoring.
- **Infrastructure & Security:** Configure enterprise-grade routers, firewalls, and OpenSource VPN solutions; implement Snort-based intrusion detection and system hardening protocols.
- **Cross-Functional Leadership:** Lead and synchronize efforts across DevOps, Network Administration, Operations, and Customer Success teams.
- **R&D & Custom Linux:** Spearheaded R&D of security products; developed custom Linux distributions using Yocto for embedded cybersecurity appliances.

Senior Software Engineer

Jul 2021 - Jun 2023

- **Client & Vendor Management:** Handle client meetings, product deployments, vendor coordination, and ensure delivery of technical solutions aligned with revenue targets.
- **Product Delivery (Cyber Kiosk):** Managed full lifecycle of hardware-integrated forensic kiosk for sanitizing mobile/storage devices with frontend UX and backend logic.
- **Product Delivery (Dorje SIEM):** Led engineering of OT traffic monitoring tool with backend logic and frontend asset detection for PLC and HMI management.

TechAvidus

Software Developer

Feb 2021 - Jun 2021

- Collaborated on scalable Node.js and Angular applications for enterprise clients with focus on performance optimization.
- Provided technical mentorship to junior developers, improving team velocity and establishing code quality standards.

Nimblechapps

Frontend Developer

Oct 2019 - Feb 2021

- Executed frontend development for diverse client projects using React and Node.js with modern tooling.

Webelight Solutions

Frontend Developer

Jul 2018 - Oct 2019

- Developed responsive web interfaces and optimized application performance using Angular frameworks.

Certifications**Google Project Management Certificate**

2026

Google · Coursera

6-Course Specialisation: Foundations of PM · Project Initiation · Project Planning · Project Execution · Agile Project Management · Capstone

Skills**AI & Agentic Development**

Advanced

AI Agent Development & Deployment,
Google ADK (Agent Development Kit),
Model Context Protocol (MCP),
LangChain / LangGraph, LLM
Integration & Orchestration, RAG
Pipelines & Vector Databases, Tool /
Function Calling, Prompt Engineering,
Workflow Automation (n8n), Local LLMs

Infrastructure & DevOps

Expert

Cloud (AWS / Azure) & Virtualization,
Proxmox, QEMU, Hyper-V, Docker,
Kubernetes, ArgoCD, CI/CD Planning &
Implementation, Automation & Bash
Scripting

Product & Leadership

Expert

Agile/Scrum & Roadmap Planning,
Cross-functional Team Leadership,
Client Meeting & Deployment Handling,
Customer Success & Vendor
Management, Revenue & Resource
Optimization

Security & Networking

Advanced

Enterprise Router & Firewall Setup, SIEM
& OT Security (Snort, Dorje),
OpenSource VPN Configuration,
System Hardware/Software Hardening,
Cybersecurity Standards & Policies

Monitoring & Analytics

Advanced

Grafana & Prometheus, Infrastructure
Monitoring, Performance Optimization,
Alert Management

Development & Tools

Advanced

Node.js, Angular, React, .NET, C++, Qt
Framework, Jira, Confluence, Git, Yocto
/ Custom Linux Distro

Education**Saffrony Institute of Technology**
